2. LITERATURE REVIEW (Cambria 11pt, Uppercase, Bold)

A literature review discusses published information in a particular subject area, and sometimes information in a particular subject area within a certain time period.

} Single Spacing

A literature review can be just a simple summary of the sources, but it usually has an organizational pattern and combines both summary and synthesis. A summary is a recap of the important information of the source, but a synthesis is a re-organization, or a reshuffling, of that information. It might give a new interpretation of old material or combine new with old interpretations. Or it might trace the intellectual progression of the field, including major debates. And depending on the situation, the literature review may evaluate the sources and advise the reader on the most pertinent or relevant. (Cambria 11pt, block-aligned paragraph)

3.1 Model and Data (Cambria, 11pt, Bold)

Equations and formulas are denoted by numbers in round parentheses and it is recommended to be produced by *Microsoft Equation Editor* or *MathType* add-on for equations in your paper (<http://www.mathype.com>). Do not copy and paste equations from other sources. Try to re-type the equations if possible. (Cambria, 10pt)

Mathematical equations must be numbered as follows: (1), (2), ...

$$f(x) = a_0 + \sum_{n=1}^{\infty} \left(a_n \cos \frac{n\pi x}{L} + b_n \sin \frac{n\pi x}{L} \right) \quad (1)$$

3.1.1 Model Calibration (Cambria, 11pt, Bold)

Figures and tables should be numbered and references to them (as Figure 1 and Table 1) must be in the text. The source is placed below the figure or table (Cambria,9pt). The figure caption is placed before the source (Cambria, 10pt). The table caption placed before the table. The example of table and figure are as follow:
